

# Santiago Palma, Ph.D.

Universidad Nacional de Córdoba, Argentina.

Ph.D. Santiago D. Palma (48 years old) is a full Professor of Pharmaceutical Technology at National University of Córdoba (UNC), Argentina. Degree in Pharmacy (1996) Degree in Biochemistry (1998). Ph. D. in Chemical Sciences (2003). Chemical Sciences School/College of Pharmacy, National University of Córdoba. Argentina

He has over 160 scientific articles including peer-reviewed journal papers, patents, and book chapters. His research interests include the design and characterization of innovative pharmaceutical platforms with applications in human and veterinary medicine including: a) Increasing the permeation and/or retention of drugs for ophthalmological use through nanotechnological strategies, b) Modification of the release/absorption patterns of Veterinary Drugs using micro/nanoparticulate systems c) Increasing efficiency of CpG-DNA administered in lyotropic liquid crystals, d) 3D printing. He is currently the director of the Research and Development Unit in Pharmaceutical Technology (UNITEFA) – CONICET and head of innovation and technological cooperation at the National University of Córdoba
